

Item Title: 2025 Wake County Community Health Needs Assessment

Specific Action Requested:

That the Board of Commissioners receive and review the 2025 Wake County Community Health Needs Assessment.

Item Summary:

A Community Health Needs Assessment (CHNA) is required of local health departments, tax exempt hospitals (501(c)(3) organizations), Federally Qualified Health Centers, and United Way agencies. The Wake County Community Health Needs Assessment is conducted every three years by Wake County Public Health in collaboration with all three local hospitals, our Federally Qualified Health Centers and other stakeholders across the county to collect data and gather insights on community challenges. As a requirement of Public Health Accreditation (Benchmarks #1.3 and 38.2), the CHNA must be presented to stakeholders after the completion of the assessment.
