

Richard Toothman  
Master Mechanic  
General Services Administration

Richard began employment with Wake County Government in June, 1991. He was hired as the Physical Plant cabinetmaker at the General Services Center.

Richard's background included many years of experience in residential and commercial design, fabrication and installation of custom millwork. He possessed certifications that included kitchen and bathroom design and custom solid surface fabrication. His abundance of experience, attention to detail and strong work ethic provided the County with an internal professional woodworker.

His accomplishments, contributions and superior craftsmanship can be observed in many facilities throughout Wake County and have drawn accolades from co-workers, upper management and many citizens.

Richard will retire on May 1 after 25 years of service to Wake County. For the first several months, he plans to relax and spend quality time with his family. Future plans include working part time at a wood working/wood craft store to extend his knowledge base and to maintain continuity with his trade.

Please join me in congratulating Richard on his retirement.
