Fleet operations did not find any issues that should prevent you from taking possession of the trailer.

Our other standard question is to ensure having the proper vehicle to tow it, so we would want to just make sure that that has been specified.

Bart/Tom,

A few weeks ago Steve Newton and I brought a trailer over for you all to look over. The trailer is being donated to the county for decontamination equipment and we wanted to make sure you all didn't see any issues with it as we moved through the process to take ownership of it. I submitted a report to our leadership saying both of you found the trailer in exceptional shape and did not see any issues with it other than noting it needed a paint job. Our leadership has requested an email directly from either of you or both of you confirming your assessment of the trailer and any other details you would like to provide. Feel free to respond directly to this email.

If you have any questions or concerns, please let me know.

Thanks.
