# THE CINCINNATI ENQUIRER

September 1, 2002

## Mentor a child, change the world

Robert K. Greenleaf's book *Servant Leadership* chronicled a Quaker who decided that he would single-handedly end the practice of slavery in America. This gentle man set out to take on a monumental and difficult task.

He traveled the countryside on his mule, going from farm to farm talking to slave owners and trying to convince them of slavery's inhumanity. Sometimes he would spend a week or two at a farmer's house, patiently arguing his case and eventually persuading the landowner to stop this practice.

From a practical standpoint, this man, despite his compassion, zeal and commitment to do what is right, could probably never have ended slavery in America.

At the height of the slave trade in 1860, there were almost 3 million slaves across the United States. It would have taken this man many lifetimes to accomplish what many believed then, and what many still today consider, a fool's task. Greenleaf's account is not about ending slavery as much as it is about one person taking a stand and starting at some place to change things. If this man was able to convince one slave owner

**Lacy**

to change his ways, he had made a significant change and had left the world in a much better state.

Sometimes when examining a complex problem, we make the mistake of thinking that it requires complex answers or solutions. For example, a large number of our African-American and Appalachian children, especially boys, will leave school before earning a high school diploma. Failure to possess even a basic high school diploma decreases the lifetime earnings of young men and women by almost a quarter million dollars.

The most effective dropout prevention program does not cost a dime. It does not flow from Washington, D.C., in the form of a block grant. It is the willingness of an adult to spend time with a young person as a mentor. Mentoring involves an adult who is willing to spend at least one hour a week with an elementary, middle-school or high school student, giving this child friendship, understanding

and sometimes just an opportunity to share his/her thoughts.

Like the Quaker who wanted to end slavery – a human tragedy far worse than a youngster dropping out of school – the solution is that it takes small, simple steps and individual commitments. As responsible adults, we have an obligation to help the next generation move toward a degree of self-sufficiency. This means taking responsibility to help our children by mentoring and tutoring.

The most effective catalyst for change is one that does something, like the Quaker who wanted to end slavery. It does not have to be enormous, but maybe if you set a goal to spend time tutoring or mentoring at least one young person during the year, you would have made a significant contribution to end the dropout problem. It was the English theologian Richard Hooker (1854-1900) who said "change is not made without inconvenience, even from worse to better."

Maybe it is time that we began to inconvenience ourselves.

## Interests & Experiences

---

**Why are you interested in serving on a Board or Commission?**

I plan to devote my career as a Licensed Clinical Social Worker to serving elders and their families through both direct care and advocacy. I view advisory boards as an ideal way to impact my local community through county government and build perspective and experience on eldercare. In particular, residential care facilities for aging adults are an essential part of longterm care in our communities. As our population ages, it is important to make sure that these institutions are meeting the needs of their consumers and expanding to reflect advances in research and changes in public policy. I want to do my part to contribute to quality of care in these settings. I am also interested in enhancing human services in general and advancing the rights of any disadvantaged groups in Wake County.
