Interests & Experiences

Why are you interested in serving on a Board or Commission?

I appreciate the services the county provides for me and my community and I feel blessed to live in Wake county. I would love to take time to give back to my community by sitting on a advisory panel or board. As a part of my current work, I reach out to pediatricians across the country to gain their input and it is invaluable at our organization. In the same way, I'd love to give back in this way.

Work Experience

I currently work as the Senior Research Program Manager at the American Board of Pediatrics, which certifies pediatricians across the country. My main research areas are 1) developmental evaluation of organizational programs, and 2) evaluating the US general pediatric and subspecialty workforce. Both of these efforts include organizing and working with stakeholder panels, survey development and analysis, and other evaluation techniques. In addition to these roles, I provide some support to help staff/manage our Foundation's Board of Directors and Research Advisory Committee. My prior work experience includes project management for a healthcare travel firm and IT consultation.

Volunteer Experience

I haven't had volunteer experience in recent years aside from leading a small group for my church for about 5-6 years. I haven't tried to do more than that until now, mostly due to being a season of life with small children. Prior experiences include working with children in need in Kenya over a period of 11 months.

Education

Masters in Public Health and Undergraduate in Biology, both from UNC-Chapel Hill.
